ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: RECORDING OF DATA WITH SPECIAL STORAGE SPACE REQUIREMENTS ON A STORAGE MEDIUM

(57) Abstract: The invention concerns a method, device and computer program product for recording a set of data (52) having certain storage requirements on a storage medium. An application obtains information about the free available storage area of the storage medium from an operating system, identifies at least one available space of the storage medium that corresponds to requirements for the set of data, orders the operating system to reserve an area, if the operating system writes data in at least one other space before the identified available space, which area corresponds to said other space for dummy storage data (50), and thereafter, orders the operating system to store the set of data (52), such that the operating system places the set of data in the identified available space.
